Tom 160 – Tom 165, 1965

Vol. 6, Nos. 1–6 January–December, 1965 Pages 1–1610

ANNUAL INDEX OF AUTHORS

Abdulaev, R. N. *The homogeneous Riemann problem on closed Riemann surfaces* 206

Adamjan, V. M. and Arov, D. Z. *A class of scattering operators and of characteristic operator-functions of contractions* 1

Scattering operators and contraction semigroups in Hilbert space 1377

Agahanov, S. A. and Natanson, G. I. *The Gibbs phenomenon for some methods of summing Fourier series* 819

Aĭzengendler, P. G. and Vaĭnberg, M. M. *Theory of branching of solutions of nonlinear equations in the multidimensional case* 936

Periodic solutions of nonautonomous systems 1419

Akuliničev, N. M. *Estimates for rational trigonometric sums of a special type* 480

Aleksandrjan, R. A. *Spectral decomposition of arbitrary selfadjoint operators into eigenfunctionals* 607

Construction of the complete family of solutions of the homogeneous Dirichlet problem for the equation of the vibrating string 633

Aleksandrov, I. A. and Gutljanskiĭ, V. Ja. *Extremum problems for classes of analytic functions with a structural formula* 1531

Aleksandrov, P. S. *On Ponomarev's theory of the absolutes of topological spaces* 385

Alenicyn, Ju. E. *Conformal mappings of a multiply-connected region onto many-sheeted surfaces with rectilinear cuts* 6

Allahverdiev, Dž. È. *On the completeness of the system of eigenelements and associated elements of non-selfadjoint operators* 102

Completeness of the system of eigenelements and adjoined elements of a class of non-selfadjoint operators depending on a parameter λ 271

Andrianov, A. N. *Representations of the modular groups on spaces of parabolic forms* 1482

Andrunakievič, V. A. and Rjabuhin, Ju. M. *Connected rings* 823

Primary ideals in noncommutative rings 1381

Aranson, S. H. *Systems of first degree of nonroughness on a torus* 1307

Arhangel'skiĭ, A. *A condition for preservation of metrizability under quotient mappings* 1127

Behavior of metrizability under factor mappings 1187

Arnol'd, V. I. *Conditions for the applicability, and estimate of the error, of an averaging method for systems which pass through states of resonance in the course of their evolution* 331

Conditions for nonlinear stability of stationary plane curvilinear flows of an ideal fluid ... 773

Babaev, A. A. and Salaev, V. V. *An analogue to the theorem of Plemelj-Privalov for the case of nonsmooth curves and its applications* 389

Badaljan, G. V. *On a problem in the theory of Watson transforms* 1344

Baranovskiĭ, E. P. *Local density minima of a lattice covering of a four-dimensional Euclidean space by equal spheres* 1131

Barnovska, M. A. *Asymptotic representation of the spectral matrix of a fourth-order differential operator* 828
Bavrin, I. I. *Some estimates of the coefficients of bounded holomorphic functions* 439
Estimates in the theory of regular functions of several complex variables 992
Certain classes of regular functions of several complex variables 1092
Belonogov, V. A. *Finite groups with a pair of nonconjugate nilpotent maximal subgroups* 566
Berezin, F. A. *Asymptotic behavior of eigenfunctions of Schrödinger's equation for many particles* 997
Berkovič, F. D. *An integral equation on the half-axis in the class of functions growing at infinity* 48
Berman, D. L. *Some extremal problems in the theory of polynomial operators* 532
On the theory of interpolation 945
The interpolation process of S. N. Bernštein in the complex domain 1191
Besov, O. V. *Density of functions with compact support and extensions of classes of differentiable functions* 1486
Bicadze, A. V. *Normally solvable elliptic boundary value problems* 1347
Birman, M. Š. and Solomjak, M. Z. *Stieltjes double operator integrals* 1567
Blank, Ja. P. and Motornyĭ, L. T. *On Blaschke's problem concerning quasitranslation surfaces* 276
Bloh, A. *A generalization of the concept of a Lie algebra* 1450
Blohina, G. N. *Theorems of Phragmén-Lindelöf type for a linear second-order elliptic equation* 720
Bojarincev, Ju. E. *Convergence of difference schemes for the wave equation with variable coefficients* 1453
Borevič, Z. I. and Faddeev, D. K. *A note on orders with cyclic index* 1273
Borisov, Ju. F. $C^{1,\alpha}$*-isometric immersions of Riemannian spaces* 869
Bredihina, E. A. *On the convergence of Fourier series of almost periodic functions* 53
Approximation of Stepanov's almost periodic functions 1196
Brègman, L. M. *The method of successive projection for finding a common point of convex sets* 688
Brjuno, A. D. *Convergence of transformations of differential equations to normal form* 1536
Bronštein, B. S. *Series close to Dirichlet series* 335
On Taylor-Dirichlet series 1385
Brudnyĭ, Ju. A. *Local best approximation of functions by polynomials* 483
Brušlinskaja, N. N. *The behavior of solutions of the equations of hydrodynamics when the Reynolds number passes through a critical value* 724
Bugrov, Ja. S. *A theorem on the representation of a certain class of functions* 1002
Buhštab, A. A. *New results in the Goldbach-Euler problem and the twin prime problem* 729
Buhvalov, A. M. *An elementary method for separation of variables in equations with several variables* 338
Byhovskiĭ, È. B. *On the absence in* C, L_p *and* W_p^1 $(1 \leq p < 2)$ *spaces of analogues to the energy inequality for the string equation with a bounded leading coefficient* 1048
Čackaja, E. Š. *Some approximation problems on sets in the complex plane* 630
Čaus, N. N. *Uniqueness classes of solutions of the Cauchy problem and representations of positive definite kernels* 895
Cekanovskiĭ, È. R. *Generalized extensions of unbounded operators* 1416
Čencov, N. N. *The categories of mathematical statistics* 1268
Čerepanov, G. P. *Boundary value problems with analytic coefficients* 436

Čerepanov, G. P. *An integrable case of the Riemann boundary value problem for several functions* 601
Čeresiz, V. M. *Almost periodic solutions of nonlinear systems* 1446
Černavskiĭ, A. V. *Topological imbeddings of polyhedra in Euclidean spaces* 1606
Černikov, S. N. *Polyhedrally closed systems of linear inequalities* 381
Černyh, N. I. *Approximation of functions by polynomials with linked coefficients* 679
Cikunov, I. K. *The structure of isometric transformations of a symplectic or orthogonal vector space* 1479
Čunihin, S. A. *Factorization of finite groups by means of indexials* 44
Daniljuk, I. I. *A nonlinear problem with a free boundary* 778
Davidenko, D. F. *An application of the method of variation of parameters to the construction of iterative formulas of increased accuracy for numerical solutions of nonlinear integral equations* 702
An application of the method of variation of parameters to the construction of iterative formulas of higher accuracy for the determination of the elements of an inverse matrix 738
Delone, B. N. *A supplement to my paper of 1933 on the reduction of a crystallographic lattice* 449
Delone, B. N.; Sandakova, N. N. and Ryškov, S. S. *Optimal cubature lattice for functions of two variables that are smooth on all sides* 836
Dem′janov, V. F. and Rubinov, A. M. *On the problem of minimization of a smooth functional with convex constraints* 9
Dem′janovič, Ju. K. *The stability of the net method for elliptic problems* 1138
Demut, Osval′d *Lebesgue integration in constructive analysis* 280
Dezin, A. A. *On the theory of operators of the form d/dt – A* 1311
D′jakonov, E. G. *The use of operators equivalent with respect to spectrum in solving difference analogues of strongly elliptic systems* 1105
Dmitriev, Ju. A. *Absolute stability of automatic systems with one sampled-data controller* 111
Frequency conditions for the dissipativity and for the existence of periodic solutions in sampled-data systems with one nonlinear block 1147
Frequency conditions for absolute stability of sampled-data automatic control systems with one nonlinear element 1205
Doan Kuin′ *The Poincaré polynomials of certain compact homogeneous spaces* 115
Dubinskiĭ, Ju. A. *Nonlinear parabolic equations of nondivergence form* 1009
Dubovickiĭ, A. Ja. and Miljutin, A. A. *Second variations in extremal problems with constraints* 12
Dybin, V. B. *An exceptional case of the convolution type of integral equation in the class of generalized functions* 491
Džabrailov, A. D. *On the direct and inverse imbedding theorems of weight spaces* 1142
Džavadov, M. G. *Asymptotic behavior of the solution of a boundary problem for a second-order elliptic equation in domains in which one of the dimensions is sufficiently small compared to the others* 106
On m-multiple completeness of half the eigenfunctions and associated functions of an ordinary differential operator of order 2m 178
Asymptotic behavior of the solution of boundary value problems for an elliptic equation in narrow regions 940
Efimov, B. *On the power of Hausdorff spaces* 1315
Efremovič, V. A. and Pupko, V. I. *The properties of equimorphisms at infinity* 17
Emel′janov, V. F. *Convergence of lacunary trigonometric series on sets* 1437
Eremin, I. I. *The relaxation method of solving systems of inequalities with convex functions on the left sides* 219

Ermakov, Ju. I. *On invariant rigging of some surfaces of special type in projective space* 840
Eršov, Ju. L. *Undecidability of certain fields* 349
On the elementary theory of maximal normed fields 1390
Fedorjuk, M. V. *Asymptotic behavior in a one-dimensional scattering problem* 676
The asymptotic behavior of solutions of ordinary linear differential equations of order n 1528
Fet, A. I. *A periodic problem in the calculus of variations* 85
Filatov, A. N. *The averaging method for systems of integrodifferential equations* 1469
Filler, F. M. *Numerical solution of Fredholm's integral equations of the second kind* 160
Fomenko, V. T. *Infinitesimal deformations of surfaces with bush constraints* 522
Fomin, V. N. *The perturbation method in the theory of dynamic stability of systems with distributed parameters* 1036
Parametric resonance of elastic systems with distributed parameters 1179
Frolov, I. S. *On the theory of generalized almost periodic sequences* 1472
Frolov, Ju. N. *The solution of an equation of infinite order in the uniqueness class* 526
Gabasov, R. and Kirillova, F. M. *A statistical problem of optimal control of a linear system* 1134
Gamkrelidze, R. V. *On the theory of the first variation* 345
Gasymov, M. G. *On the determination by two of its spectra of a Sturm-Liouville equation with a singularity* 396
Expansion in eigenfunctions of a nonselfadjoint boundary value problem for a differential equation with a singularity at zero 1426
Gavrilov, V. I. *Behavior of a holomorphic function in the neighborhood of an essentially singular point* 693
Geče, F. I. *Properties of the growth of entire functions of several complex variables* 1242
Geĭsberg, S. P. *Quasianalytic functions in* $L(-\infty, \infty)$ 1350
Gel'man, I. V. *Stability of solvable extensions of partial differential operators* 899
Geronimus, Ja. L. *Some asymptotic properties of orthogonal polynomials* 1387
Gindikin, S. G. and Pjateckiĭ-Šapiro, I. I. *The algebraic structure of the field of Siegel's modular functions* 831
Glagoleva, R. Ja. *A three-cylinder theorem and its applications* 1004
Glazman, I. M. *Relaxation on surfaces with saddle points* 487
Gluško, V. P. *On the existence and uniqueness of solutions of certain boundary-value problems for degenerating elliptic equations of second order* 880
Gohberg, I. C. and Fel'dman, I. A. *Approximate solutions of some classes of linear equations* 174
Reduction method for systems of equations of Wiener-Hopf type 1433
Gohberg, I. C. and Kreĭn, M. G. *Multiplicative representation of the characteristic functions of operators close to unitary* 1279
Gol'dman, M. A. and Kračkovskiĭ, S. N. *The d-characteristic of a linear operator* 1455
Golinskiĭ, B. L. *Limiting relations and asymptotic formulas for polynomials orthogonal on the unit circumference* 214
Golubjatnikov, A. N. *Nonlinear spinor functions* 1430
Gončar, A. A. *The property of "instability" of harmonic capacity* 1458
Gorčakov, V. N. *Asymptotic properties of the spectral function of hypoelliptic operators* 170
Govorov, N. V. *On the indicator of functions of nonintegral order that are analytic and of completely regular growth in a halfplane* 697
Grigor'eva, I. A. *On the form of extremal non-negative polynomials with coefficients subject to several linear relations* 733

Grinberg, G. A. *Integral equations whose kernel depends on the absolute value of the difference between the arguments and whose variables vary in a finite interval* 1100
Gudiev, A. H. *Differential properties of the traces of functions on hyperplanes of any dimensionality* 61
Guichardet, A. *Tensor products of C^*-algebras* 210
Gurariĭ, V. I. *Moduli of convexity and flattening of Banach spaces* 535
Spaces of universal disposition 1051
Haĭrullina, S. P. *Cauchy problems with initial data on the line of degeneracy* 563
Havinson, S. Ja. *On the Rudin-Carleson theorem* 1476
Hedrlín, Z. *Commutative systems as generalized semigroups* 1238
Ibragimov, I. A. *On a strong mixing condition for stationary Gaussian processes* 356
The rate of convergence to the normal distribution 580
Complete regularity of multidimensional stationary processes with discrete time 783
Ibragimov, I. I. and Aliev, R. M. *Best quadrature formulas for certain classes of functions* 621
Il'in, A. M. *Eigenfunctions of an elliptic operator in certain unbounded regions* 496
Stability of difference schemes for the Cauchy problem for systems of partial differential equations 1247
Il'in, V. A. *The classical formulation of the problem of a localization principle for Fourier series in the eigenfunctions of multidimensional regions* 124
Casàro, Riesz and Poisson-Abel summability of Fourier series in the eigenfunctions of the Laplace operator 192
Isakova, E. K. *The limit amplitude principle for certain boundary value problems in the plane* 786
Ivanov, A. V. *Apriori estimates for solutions of linear second-order equations of elliptic and parabolic types* 583
Ivanov, I. S. *Free T-sums of multioperator skew fields* 1398
Jakovlev, M. N. *Estimates of the H-condition numbers of matrices in the Petrov-Galerkin method* 933
Jakubovič, V. A. *Frequency conditions for the absolute stability and dissipativity of control systems with a single differentiable nonlinearity* 98
Januŝauskas, A. *On the problem of the oblique derivative* 1303
Kac, I. S. *Some cases of uniqueness of the solution of the inverse problem for strings with a boundary condition at the singular end* 1324
Kačurovskiĭ, R. I. *Monotone nonlinear operators in Banach spaces* 953
Kadec, M. I. *Topological equivalence of certain cones in Banach space* 847
Kagan, A. M. and Sudakov, V. N. *The structure of the complete class of unbiased estimates for families of distributions of a special type* 1209
Kamynin, L. I. *Ljapunov's theorems for heat potentials* 66
Kamynin, L. I. and Maslennikova, V. N. *Boundary estimates for the solution of the problem involving a directional derivative for a parabolic equation in a noncylindrical domain* 128
Karacuba, A. A. *On the estimation of the number of solutions of certain equations* 1402
Systems of congruences and equations of Waring type 1439
Karev, G. P.; Treskov, S. A. and Fridman, G. Š. *Estimate of the complexity of a function in the algebra of logic* 1493
Kirillov, A. A. *Positive definite functions on a group of matrices with elements from a discrete field* 707

Kljušin, V. L. *On a certain class of inverse images of metric spaces* 957
Komlenko, Ju. V. *Some criteria for nonoscillation and boundedness of solutions of linear differential equations* 1212
Kondrašov, V. I. *Boundary value problems for differential and integrodifferential equations in the spaces* $W_{p_1}^{m_1 \cdots m_k}, W_{p_1}^{m_1 \cdots m_k}{}_{p_k, b_1 \cdots b_n}$ 1576
Kondrat'ev, V. A. *General boundary value problems for parabolic equations in a closed region* 906
Konoplev, V. P. *The asymptotic behavior of orthonormal polynomials at one-sided singular points of weighting functions (algebraic singularities)* 223
Kontorovič, P. G.; Ivanov, S. G. and Kondrašov, G. P. *Distributive pairs of elements in a lattice* 228
Korbut, A. A. *Extremal spaces* 1358
Kordzadze, R. A. *On singular integral equations with a shift* 283
Korenbljum, B. I. *Quasianalytic classes of functions in a circle* 1155
Korotkov, V. B. *Tests for compactness in abstract function spaces and complete continuity of the imbedding operator* 132
Integral operators with Carleman kernels 1496
Kostrikin, A. I. *The height of simple Lie algebras* 794
Kosulin, A. E. *One-dimensional singular equations in generalized functions* 1055
Kovalenko, I. N. *On a limit theorem for determinants in the class of Boolean functions* 456
Reconstruction of the characteristics of a system through observations on the outflow 1328
Kovalenko, L. I. *The difference method and the uniqueness of the generalized solution of the Tricomi problem* 747
Generalized solution of the Tricomi problem 789
Krall, Allan M. *On nonselfadjoint ordinary differential operators of second order* 1581
Krasičkov, I. F. *Estimates from below for entire functions of finite order and the convergence of Dirichlet polynomials* 798
Krasnosel'skiĭ, M. A.; Klimov, V. S. and Lifšic, E. A. *Convergence of positive functionals and operators* 644
Kratko, M. I. *A class of Post calculi* 1544
Kreĭnin, Ja. L. *CΦ-kernels of sets effectively different from Φ-sets* 1500
Krylov, V. Ju. *Integration of analytic functionals with respect to distributions with alternating signs* 910
Kufarev, B. P. and Nikulina, N. G. *Lebesgue measure of subsets of Euclidean space as the leading variation of the function defined by the distance to a closed set* 232
Kušner, B. A. *On the existence of unbounded analytic constructive functions* 26
Constructive theory of the Riemann integral 1584
Kušnirenko, A. G. *An estimate from above for the entropy of a classical dynamical system* 360
Kuz'mina, G. V. *Covering theorems for functions holomorphic and univalent within a disk* 21
Kuz'minov, V. *The limit sequence of an exact sequence of inverse spectra* 959
Kuznecov, A. V. *Analogs of the "Sheffer stroke" in constructive logic* 70
Kuznecov, N. V. *Asymptotic formulas for the eigenvalues of an elliptic membrane* 500
Lašnev, N. *Continuous decompositions and closed mappings of metric spaces* 1504
Lavrent'ev, M. M. *A class of inverse problems for differential equations* 29
Lavrik, A. F. *The problem of divisors in segments of arithmetical progressions* 1362
Lelek, A. *On the dimension of remainders in compact extensions* 136

Lemleĭn, V. G. *A property of alternative quasigroups with an invariant finite measure* 1288
Leont'ev, A. F. *Construction of a functional equation with a given system of particular solutions* 33
Representation of arbitrary functions by Dirichlet series 1159
Representation of arbitrary entire functions by Dirichlet series 1507
Levin, A. Ju. *On an algorithm for the minimization of convex functions* 286
Levin, V. L. *Functors in categories of Banach spaces defined by KB-lineals* 648
Tensor products and functors in categories of Banach spaces defined by KB-lineals 1059
Levitan, B. M. and Sargsjan, I. S. *An extension of the solutions of a one-dimensional Dirac system* 1588
Lidskiĭ, V. B. and Frolov, P. A. *The topological structure of stability regions of a self-adjoint system of differential equations with periodic coefficients* 505
Lifanov, I. K. *On two problems posed by Mardešić* 800
Lifšic, E. A. *Duality principles for the problem of periodic solutions of higher-order differential equations* 1442
Lihtman, A. L. *On subgroups of the multiplicative group of a skew field* 915
Linnik, Ju. V. *An application to mathematical statistics of a theorem of H. Cartan* 291
Tests, unbiased estimates, and cotest ideals 459
Lipkina, Z. S. *Locally bicompact rings without zero divisors* 462
Litvinčuk, G. S. *Noether theorems for a class of singular integral equations with shift and conjugation* 625
Lizorkin, P. I. *On the Fourier transform in Besov spaces. The zero scale* $B^0_{p,\theta}$ 1110
Ljubič, Ju. I. *General theorems on quadratic relaxation* 588
Ljubič, Ju. I. and Tkačenko, V. A. *Uniqueness and approximation theorems for a local Laplace transformation* 1216
Loginov, È. A. *Regular three-color painting* 963
Logunov, A. I. and Caljuk Z. B. *On the uniqueness of solutions of Volterra integral equations with lagging argument* 235
Lokucievskiĭ, O. V. *On the topology of continua* 1365
Lorenc, A. A. *Equations without coefficients in free groups* 141
Lozanovskiĭ, G. Ja. *Reflexive spaces generalizing reflexive Orlicz spaces* 968
Lozinskiĭ, S. M. *A contribution to the theory of finite matrices* 1014
Estimates of a spherical matrix norm and of the corresponding logarithmic norm 1511
Lukankin, G. L. *The behavior of a Temljakov type* I *integral at the skeletal points of a domain D of type A* 363
Magomedov, G. M. *Continuous dependence on the shift of the solutions of a singular integral equation with a shift* 1017
Makarov, V. L. *Asymptotic solutions for linear dynamic models of economic systems with discrete time* 1515
Makarov, V. S. *A class of decompositions of the Lobačevskiĭ space* 400
Mal'cev, A. I. *Positive and negative numerations* 75
Mamedov, Ja. D. *Certain properties of solutions of nonlinear equations of parabolic type in Hilbert space* 545
The Cauchy limit problem for differential equations of first and second order with unbounded nonlinear potential operators 1369
Mamedov, Š. R. *Some relations between best power approximation of analytic functions and the coefficients of their expansions into series* 1519

Mandel'cveĭg, V. B. *Decomposition of a representation of a reducible Lie algebra into representations of its regular reducible subalgebras of maximum rank* 851
Markus, A. S. *Multiple completeness and convergence of multiple expansions in the system of eigenvectors and adjoined vectors of an operator bundle* 1062
Martynov, V. V. *Conditions for discreteness and continuity of the spectrum of a selfadjoint system of first-order differential equations* 1546
Maslov, S. Ju.; Minc, G. E. and Orevkov, V. P. *Unsolvability in the constructive predicate calculus of certain classes of formulas containing only monadic predicate variables* 918
Matiĭčuk, M. I. and Èĭdel'man, S. D. *Parabolic systems with coefficients satisfying Dini's condition* 1461
Maz'ja, V. G. and Plamenevskiĭ, B. A. *Singular equations with a vanishing symbol* 294
Mel'nik, Z. O. *Solvability of general mixed problems in a right cylinder in the case of analytic hyperbolic integro-differential equations* 1067
Mel'nikov, V. K. *On some cases of conservation of conditionally periodic motions under a small change of the Hamiltonian function* 1592
Menšov, D. *On limits of indeterminacy with respect to measure and limit functions of trigonometric and orthogonal series* 298
Mihaĭlov, V. P. *Asymptotic behavior of solutions of certain nonstationary boundary-value problems for* $t \to \infty$ 710
The behavior of certain classes of polynomials at infinity 1256
Milin, I. M. *Estimation of coefficients of univalent functions* 196
Millionščikov, V. M. *Recurrent or nearly periodic limit trajectories of non-autonomous systems of differential equations* 367
The asymptotic behavior of solutions of linear systems with small perturbations 652
Mil'man, D. P. *Formulation and solution of a general boundary value problem in operator theory as an aspect of functional analysis. Problems of Cauchy and Dirichlet type* 592
Mil'man, V. D. *Certain properties of unconditional bases* 656
Mitjagin, B. S. and Sadovskiĭ, B. N. *On linear Boolean operators* 1523
Mitjuk, I. P. *Some properties of functions regular in a multiply connected region* 1252
Moĭšezon, B. G. *Irreducible exceptional submanifolds, of the first kind, of three-dimensional complex-analytic manifolds* 402
Monahov, V. N. *Unique solvability of two-dimensional problems of gas dynamics with free boundaries* 1332
Murskiĭ, V. L. *The existence in three-valued logic of a closed class with finite basis, not having a finite complete system of identities* 1020
Musojan, V. H. *Representation of an arbitrary analytic function by special series* 1162
Naĭmark, M. A. *Unitary representations of locally compact groups in the space* Π_1 78
Conditions for unitary equivalence of commutative symmetric algebras in the space Π_k .. 301
Commutative operator algebras in the space Π_k 509
Neĭmark, Ju. I and Šil'nikov, L. P. *A case of generation of periodic motions* 305
Nelepin, R. A. *Nonlinear high-order automatic systems investigated by exact analytic methods* 513
Nikol'skiĭ, Ju. S. *On the theory of weight classes of differentiable functions of several variables and its applications to boundary-value problems for elliptic equations* 714
Boundary values of functions from weight classes 1260
Novikov, S. P. *Homotopic and topological invariance of certain rational classes of Pontrjagin* 854
Topological invariance of rational Pontrjagin classes 921

Oleĭnik, O. A. *On the smoothness of solutions of degenerate elliptic and parabolic equations* 972
Olevskiĭ, A. M. *Extension of the theorem of Du Bois-Reymond to bounded orthonormal systems of functions* 1071
Olevskiĭ, M. N. *Relations among the solutions of a singular Cauchy problem associated with the generalized Euler-Poisson-Darboux differential operator equation* 237
Oniščik, A. L. *Deformations of fiber bundles* 369
Orevkov, V. P. *Certain reduction classes and solvable classes of sequents for the constructive predicate calculus* 888
Unsolvability of the class of formulas of type $\neg\neg \forall\exists$ *in the constructive predicate calculus* 977
Orevkov, Ju. P. *A generalization of Skljarenko's theorem* 1029
Oročko, Ju. B. *Behavior of the eigenfunctions of the Schrödinger operator at infinity* 1075
Osmatescu, P. K. *Extension of perfect mappings to* $\omega\alpha$ *compactifications* 1336
Ostrovskiĭ, I. V. *Decomposition of infinitely divisible laws without Guassian component* 372
Ovčinnikov, I. S. *Metric properties of mappings in the* $BL^{3/2}$ *class* 465
Ovsjannikov, L. V. *A singular operator in a scale of Banach spaces* 1025
Pak, I. N. *Properties of the sums of some sine and cosine series* 1033
Palamodov, V. P. *The problem of M-convexity* 550
Pasynkov, B. A. *Almost metrizable topological groups* 404
Pehleckiĭ, I. D. *Classes of analytic functions on open Riemann surfaces with univalently attainable boundary* 245
Petrosjan, L. A. *A family of differential games of survival into the space* R^n 377
Differential survival games with many participants 409
Petrov, V. V. *An estimate of the deviation of the distribution of a sum of independent random variables from the normal law* 242
Phan Đình Diệu *Constructive locally convex linear topological spaces* 764
The metrizability, normability and multinormability of constructive locally convex spaces 814
Plamenevskiĭ, B. A. *Singular integral operators on a group* 1166
Platonov, V. P. *The structure of periodic linear groups and algebraic groups* 144
Engel elements and the radical in PI-algebras and topological groups 412
Contributions to the theory of topological groups 752
Pljuškjavičjus, R. A. *A version of the constructive calculus of predicates without structural deduction rules* 416
Plotnikov, V. I. *Uniqueness and existence theorems and apriori properties of generalized solutions* 1405
Pohožaev, S. I. *Eigenfunctions of the equation* $\Delta u + \lambda f(u) = 0$ 1408
